Introducing Eaton's Newest ACCESS Master Distributor

Universal Utility Supply Company (UUSCO)

Eaton is pleased to announce the addition of our newest ACCESS Master Distributor, Universal Utility Supply Co of Illinois (UUSCO). UUSCO has added a variety of key Line Installation and Protective Equipment (LIPE) products to their warehouse in West Chicago, IL to help service the needs of customers in the Midwest and Gulf states. Distributors and Manufacturer's Reps in other Regions can also take advantage of UUSCO as a Nationally Authorized stocking distributor.

In 2005, the ACCESS Distributor program was introduced to help the Commercial & Industrial sales team gain access to Eaton's Power Systems Division (PS) shelf-goods products through establishment of a stocking distributor network. ACCESS Master Distributors act as aggregators for Cooper Power series shelf-good products and serve both Eaton PS Manufacturer's Representatives that buy and resell products and non-stocking distributors in diverse geographies.

Please join me in welcoming UUSCO of Illinois as our newest ACCESS Master Distributor, and please feel free to share your experiences and needs with Pete, Dave, Connor and the UUSCO team.
